Health Hazards or Risks From Exposure

This material is an organic lead compound. Dust or fume can cause eye irritation consisting of redness, swelling, and pain. May cause conjunctivitis with repeated exposures. Skin contact with dust may cause irritation consisting of redness and/or swelling. May be harmful if absorbed through skin. Harmful if inhaled. Inhalation of high concentrations may cause respiratory and nasal irritation, coughing, and difficulty breathing. Ingestion may cause nausea, vomiting, constipation, cramps, and or stomach pain. Chronic exposure to lead can cause kidney damage, anemia, reproductive effects, developmental effects and permanent nervous system damage in humans including changes in cognitive function.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Components	% By Weight	CAS Number	EINECS/ ELINCS #
Normal lead styphnate	100	15245-44-0	239-290-0

4. FIRST AID MEASURES

<u>Eye Contact:</u>	Immediately flush out fume or particles with large amounts of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. If eye irritation develops, call a physician at once.
<u>Skin Contact:</u>	Wash skin with plenty of soap and water for at least 15 minutes. Remove contaminated clothing and shoes and launder before reuse. If skin irritation or rash develops and persists or recurs, get medical attention..
<u>Inhalation:</u>	If symptoms of lung irritation occur (coughing, wheezing or breathing difficulty), remove from exposure area to fresh air immediately. If breathing is difficult, give oxygen. If breathing has stopped, perform artificial respiration. Keep affected person warm and at rest. Get medical attention.
<u>Ingestion:</u>	If ingested, immediately call a physician. Induce vomiting if possible, as directed by medical personnel. Never give anything by mouth to an unconscious person.

Medical Conditions Aggravated By Exposure:

Exposure may aggravate an existing dermatitis, blood condition, asthma, kidney disease, emphysema, or other respiratory disease.

Recommendations To Physicians:

There is no specific antidote for this chemical. Remove from exposure and treat symptoms.

5. FIRE FIGHTING MEASURES

Lower Explosive Limit:	Not applicable	Autoignition Temp.:	No data
Upper Explosive Limit:	Not applicable	Flammability Classification: (defined by 29 CFR 1910.1200)	Explosive

Unusual Fire and Explosion Hazards:

Do not subject to mechanical shock. Material involved in a fire may not be totally destroyed and will still be subject to detonation. Dust may cause an ignitable and/or an explosive atmosphere.

Extinguishing Media:

Water spray. Apply by mechanical means only.

Special Firefighting Procedures:

Fire involved cargo may explode. Fight all fires from an explosion resistant location. Evacuate all non-essential personnel.

Use water to cool containers exposed to fire. Do not move material exposed to or involved in a fire. Use extreme caution working around this material and avoid any form of mechanical shock. Keep material wet if possible. "DO NOT ALLOW TO DRY."

Firefighters must wear self-contained breathing apparatus (SCBA) and full protective equipment. Structural firefighters' protective clothing will only provide limited protection.

Prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas, if practical.

6. ACCIDENTAL RELEASE MEASURES

FOR ALL TRANSPORTATION ACCIDENTS, CALL CHEMTREC AT 800-424-9300.

Spill Response: A SPILL OF THIS PRODUCT WILL REPRESENT AN EXPLOSION HAZARD. Remove all sources of ignition. Stop source of spill as soon as possible and notify appropriate personnel. Clean-up of this material will require extreme caution. Use non-sparking equipment and keep material wet at all times. If a large spill occurs call 1-888-289-1911 for technical assistance.

Accidental Release Procedures: If a large spill occurs create a dike and flood with large amounts of water. Prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas. See Section 13 for waste disposal.

7. HANDLING AND STORAGE

Precautions for Safe Handling: DO NOT SUBJECT TO MECHANICAL SHOCK. Avoid dispersion of dust in air. Dust should be removed by washing or HEPA vacuuming. Use appropriate personal protective equipment (see Section 8). Workers should wash hands thoroughly after handling. Eating, drinking and smoking should be prohibited in areas where this material is handled and stored.

Conditions for Safe Storage: Store in accordance with local regulations. Store in a cool, dry, well-ventilated place away from all sources of ignition. Do not store at temperatures above 65.5°C (150°F). Product has a 2 year shelf life. Store as prescribed by Bureau of Alcohol, Tobacco and Firearms guidelines for explosive storage. Store away from Acids, Class B & C explosives, strong oxidizers, and caustics. Avoid mechanical impact or shock and electrical discharge.
